

Jeannette M. Wing, Ph.D.,

is the president's professor of computer science and the head of the computer science department at Carnegie Mellon University. She received her S.B. and S.M. degrees in electrical engineering and computer science in 1979 and her Ph.D. degree in computer science in 1983, all from the Massachusetts Institute of Technology.

Wing's general research interests are in the areas of specification and verification, concurrent and distributed systems, and programming languages. Her current focus is on the foundations of trustworthy computing.

Wing has published extensively in top journals and major conferences and has given over 200 invited, keynote and distinguished lectures. She was or is on the editorial board of nine journals, including the *Journal for the ACM*.

Wing is a member of many advisory boards, including: the Networking and Information Technology (NITRD) Technical Advisory Group to the President's Council of Advisors on Science and Technology (PCAST), the National Academies of Sciences's Computer Science and Telecommunications Board, Microsoft's Trustworthy Computing Academic Advisory Board, and the Intel Research Pittsburgh's Advisory Board. She is a member-at-large on ACM Council. She was a member of the DARPA Information Science and Technology (ISAT) Board and the National Science Foundation Scientific Advisory Board. She was on faculty at the University of Southern California, and has worked at USC/Information Sciences Institute and Xerox Palo Alto Research Laboratories. She spent a sabbatical at MIT in 1992 and at Microsoft Research 2002-03. She has consulted for Digital Equipment Corporation, the Mellon Institute (Carnegie Mellon Research Institute), System Development Corporation, and the Jet Propulsion Laboratory. She is a member of AAAS, ACM, IEEE, Sigma Xi, Phi Beta Kappa, Tau Beta Pi, and Eta Kappa Nu. Wing is an ACM Fellow and an IEEE Fellow.

Monday, February 19, 2007

10:30 a.m. Registration
Cleary Alumni & Friends Center

11 a.m. Symposium
"Automatic Generation and Analysis of Attack Graphs"

Noon Reception for Dr. Wing
Cleary Alumni & Friends Center

4:30 p.m. Registration
Cleary Alumni & Friends Center

5 p.m. Keynote
"Computational Thinking: Thinking Like a Computer Scientist"

6 p.m. Informal Questions/Social
Cleary Alumni & Friends Center

All events are open to the public but may we suggest you reserve a place by registering in advance using the form attached.

Persons attending the Lecture Series may park in University Lot #12, the Cleary Alumni & Friends Center at East Avenue & La Crosse Streets.

For further information contact:

Dr. Steve Senger
Computer Science Department
University of Wisconsin-La Crosse
1725 State Street
La Crosse, WI 54601

Symposium Lecture:

"Automatic Generation and Analysis of Attack Graphs"

Attack graphs represent the ways in which an adversary can exploit vulnerabilities to break into a system. System administrators analyze these attack graphs to understand where their system's weaknesses lie and to help decide which security measures will be effective to deploy. In practice, attack graphs are produced manually by Red Teams. Construction by hand, however, is tedious, error-prone, and impractical for attack graphs larger than 100 nodes. In this talk, Wing presents a technique, based on model checking, for generating attack graphs automatically. She also describes different analyses that system administrators can perform in trading off one security measure for another. These analyses can answer questions such as "Given a set of measures, what is a minimum subset needed to make this system safe?" This work is joint with Somesh Jha and Oleg Sheyner.

Jeannette M. Wing, Ph.D., is a contender on the job and off. She's a third-degree black belt and certified teacher in Tang Soo Do martial arts.

Keynote Lecture:

"Computational Thinking: Thinking Like a Computer Scientist"

Wing's vision for the 21st Century: Computational thinking will be a fundamental skill used by everyone in the world. To reading, writing, and arithmetic, we should add computational thinking to every child's analytical ability. Computational thinking involves solving problems, designing systems and understanding human behavior by drawing on the concepts fundamental to computer science. Thinking

like a computer scientist means more than being able to program a computer. It requires thinking at multiple levels of abstraction. In this talk Wing will give many examples of computational thinking, argue that it has already influenced other disciplines, and promote the idea that teaching computational thinking can inspire future generations to enter the field of computer science.

The University of Wisconsin-La Crosse Distinguished Lecture Series in Computer Science is funded by private gifts to the UW-La Crosse Foundation, Inc. and through support from the Department of Computer Science and the College of Science and Health. The purpose of the series is to bring to La Crosse each year a computer scientist whose significant accomplishments and communication skills can inspire and enrich the careers of students and faculty and the computer community in general.

UW-L is one of 13 four-year campuses of the UW System. The university offers a broad range of undergraduate majors and master's level programs in selected disciplines. Current enrollment is about 9,200 students with approximately 150 computer science majors. La Crosse is located in western Wisconsin on the Mississippi River. It is on direct transportation routes between Chicago, Milwaukee, Madison and Minneapolis-St. Paul. It is served by Amtrak (Chicago, Milwaukee and St. Paul line) and numerous bus lines. Scenic secondary roads and highways (I-90 in particular) connect La Crosse with Chicago, Milwaukee, Madison, Rochester, and the Twin Cities. American Eagle and Northwest Airlines provide regular passenger service to major midwestern air terminals.

UNIVERSITY of WISCONSIN
LA CROSSE

Distinguished Lecture Series in Computer Science

Jeannette M. Wing, Ph.D.

**President's Professor and
Head of Computer Science
Carnegie Mellon University**

**Monday, February 19, 2007
Cleary Alumni & Friends Center**

Co-sponsored by the
University of Wisconsin-La Crosse Foundation Inc.
